

SOCIAL & EMOTIONAL SUCCESS

What will we accomplish?

Our goal is for students in need of social and emotional support to understand and use the resources at school and in the community to experience both social and emotional success.

What are we doing?

Use **Student Support Teams** in all buildings to identify students with social and emotional issues and partner with families on connecting students to **community and school-based services**.

Provide school-based **therapeutic supports** for students with mental health concerns.

Connect students and families to **community mental health resources**.

How are we doing?

<i>Goal</i>	<i>2010</i>	<i>2011</i>
The number of students with access to school based mental health services will increase.	728	
The % of students referred (and receiving) community-based mental health services will increase.	93%
